

Thermoprocessed Egg Derivatives for Animal Consumption Export to Argentina

- This certificate should be used only for [inedible](#) thermoprocessed egg products intended for animal consumption. The Food Safety Inspection Service (FSIS) endorses export certificates for edible thermoprocessed egg products.
- Production facilities must be inspected and approved by the USDA APHIS Veterinary Services at least annually.
- If the production facility does not have an official APHIS approval number, the “establishment number” on the certificate may be left blank.
- If the products are stored at the production facility prior to export, use the production facility information to complete the “storage facility” section.
- Argentina requires an import permit for the entry of these products. For APHIS VS to certify that “the facility is authorized by SENASA to export to Argentina,” the exporters should provide the applicable VS Area Office with a copy of their import permit.
